Celebrating the Science of Astronomy and the Universe

StarTalk Radio with Neil Degrasse Tyson

<http://www.startalkradio.net/>

StarTalk Radio is a mixed bag of science and daily issues brought with both clarity and humor. When asked about his target audience, Tyson replied, "All the people who never knew how much they'd love learning about space and science." So log on and submit a question, read the blog or tune in to current or past episodes of StarTalk.

Eyes on the Sky

<http://eyesonthesky.com/>

Eyes on the Sky has two main objectives: astronomy outreach and education & light pollution reduction. In addition to weekly themed video presentations about the night sky, visitors can get answers to questions about stargazing and telescopes, access a glossary of terms, download free star charts, find free videos that help with stargazing and learn simple steps we can take to reduce light pollution. You can also visit the Eyes on the Sky YouTube channel at

Astronomy Picture of the Day - NASA

<http://apod.nasa.gov/apod/archivepix.html>

Interested in some amazing imagery? If so, this is the site for you. From sources such as Voyager 2 and the Hubble Space Telescope, NASA posts a different image along with a brief description every day.
